

Client: Advent Venture Partners, 25 Buckingham Gate, London SW1E 6LD

The Project

The complete strip out of an existing conference room facility and installation of five new meeting rooms, reception and audio visual conferencing package.

Client Objectives

To create a crisp, modern meeting facility that would impress Clients and ensure their privacy while they were visiting the offices. To create a design that would not date quickly and would wear well. To maximize the use of space which had been a major drawback of the previous installation. To keep the project within strict cost guidelines.

Key Facts

Extensive liaison required with other tenants in the building to manage construction noise and deliveries in a multi-occupied building. Installation of an audio-visual conferencing package that can be used in all the rooms and which can be controlled from reception. Construction works completed with the Client in occupation, and with an interim move onto the floor while the works were in progress.
