

Client: UHY Hacker Young, Thomas Moor Square, London EC3

The Project

The design and fitting out of 22,000 sq ft of office space in Thomas Moor Square to provide Partners offices, open plan areas and Client meeting facilities for this firm of Accountants.

Client Objectives

To move all Staff into newly fitted space prior to the deadline of January 2008. This was a key date for the Client's business operations as a relocation during this period of the Client's business year would have caused a major disruption to operations.

To create a fresh image for the firm together with an improved working environment for Staff.

Key Facts

Interactive Space was instrumental in the lease negotiations ensuring that the Landlord provided sufficient chilled water to the air conditioning system to the Client's floors. This had shown to be lacking in the Surveys and validations which we carried out prior to exchange.

Good programming was essential to the success of the project.

By good design coordination and critical path programming by Interactive, the Contractor fitted out the two floors in 9 weeks.
